

# Sonoco's Paper Container | PAPER BOTTOM

## Consumer

### End-Users Empowered

Our rigid paper cans are easy for consumers to recycle. Simply empty, remove the plastic lid, and place into the recycling bin!

## Single-Stream

### No Consumer Sorting Required

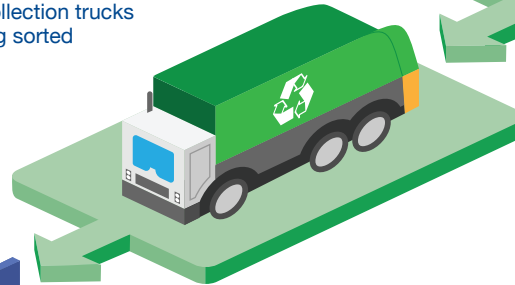

All recyclables are mixed together in the bin.

## Recycling Center

### Local Municipality

Recyclables are collected using specialty collection trucks before being sorted and baled.

## MRF

### Materials Recovery Facility

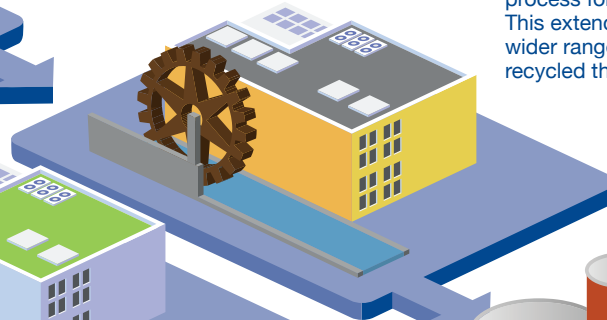

Recyclables are sorted and baled at this location before moving on to be processed.

## SPECIALIZED PAPER MILL

### Process Mixed Paper into Paper

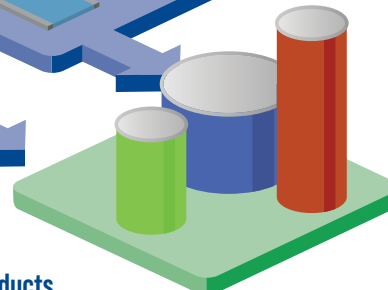

Enhanced mills carry out the pulping process for a longer period of time. This extended process means a wider range of paper materials can be recycled there.

## STANDARD PAPER MILL

### Processing Paper into Paper

At standard paper mills, the fiber in our rigid paper cans is recovered and converted into paperboard. It is then made into new products – including new paper cans.

## Creating new products

### Did you know?

Our rigid paper cans are made from recycled paperboard in the can body, making this can an ideal example of circularity.
