Annual Progress Report - Calendar 2015

Substances for which toxic substance reduction plans have been prepared:	
Substance	CASRN
Oxides of Nitrogen (NOx)	11104-93-1

Plan Objectives
 The reduction of toxic substance use, creation and releases is a priority for Sonoco forming part of their sustainability programs and EMS. Sonoco's goal is to reduce the creation and release of NOx where technically and economically feasible. Based on currently available information and technologies, there are no technically and economically feasible reduction options currently available for this substance. It is important to note that NOx is generated through the combustion of fuel sources at the facility and that most current research seeks to abate these emissions using end of pipe controls.

Toxics Reduction Progress
 The reporting period saw slight increases in the quantities of Nitrogen Oxides created and released due to changes in the quantity of natural gas used in 2015. The facility's overall natural gas usage increased slightly in 2015 relative to 2014 due to slight changes in the overall production at the facility. In terms of the main equipment, the natural gas used by the cogeneration turbine increased in the current year whereas the natural gas used by the boiler and ancillary equipment (e.g., comfort heaters) decrease slightly in 2015 relative to 2014.

Plan Implementation Progress
 There were no reduction options identified in any of the plans for the above noted substances that were identified as being both technically and economically feasible. As such, there were no timelines presented in the reduction plans for the above noted substances. However, Sonoco will continue to explore and investigate potential reduction options as they arise as part of their sustainability program.

As there were no anticipated reductions noted in each of the plans for the toxic substances noted above, there were no reductions of any toxic substances during the reporting period that would be attributable to any reduction plan.

Certification Statement

As of May 30, 2016, I certify that I have read the reports on the toxic substance reduction plan for Oxides of Nitrogen and am familiar with its contents and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
