

Rigid Dye Tubes

Sonoco Crellin offers a complete line of rigid dye tubes for various dye spindles. The injection molded tubes are designed for use on high-speed winders. Consistent dimensions make the tubes suitable for automated spinning and dyeing equipment.

A variety of dye tube separators is also available as well as several sizes designed to be used without separators. The NS & M/F designations have a stacking feature designed into the tube, eliminating the need for a separator.

- One-time-use and multi-use design
- Filter paper is an option
- Suitable for wool, wool blends, cotton, cotton blends, and man-made fibers
